

GERBER SCIENTIFIC PRODUCTS

Complete Supplies and Materials List

Contains part numbers for:

- Edge Foils
- Vinyl Films
- Edge-Ready Materials
- Application Tapes
- Fonts & Libraries
- Edge and Plotter Accessories
- Router Bits
- Router Accessories
- Wide Format Materials and Inks
- Small format Materials

Product Bulletins for most materials are available at www.gspinc.com

GerberColor **Process Pro** – CMYK Foils – Edge 1 and 2

See page 8 for EDGE FX Process Pro Foils

Custom-formulated, resin-based, semi-gloss foils for four-color process prints, process color simulations of solid PANTONE® colors, EDGE Match™, and photographic bitmap reproductions. Three-year exterior life performance. Use with GerberColor Spectratone™ to produce additional colors. Warranted as specified when used on Gerber-approved EDGE READY™ materials.

<u>Color</u>	<u>Part Number</u>

Process Magenta – GCP 873	P76281A
Process Yellow – GCP 805	P76280A

GerberColor **Transparent Foils** – Edge 1 and 2

See page 8 for EDGE FX Transparent Foils

Custom-formulated, resin-based, transparent color foils will provide three-year exterior life performance. The unique transparent feature allows the characteristics of the base EDGE READY™ material to come through. GCT foils should be double-hit for best backlit results. Use with GerberColor Spectratone™ to produce additional colors. Warranted as specified when used on Gerber-approved EDGE READY™ materials.

Platinum Medal – GCM-730	GCM730

GerberColor **Spectra Tint and Shade - Edge 1 and 2**

See page 9 for EDGE FX Spectra Tint and Shade

Introducing GerberColor™ SpectraTint and SpectraShade, two new foils designed to modify the appearance of the base color foils. Use these new foils to offer your customers a wider range of EDGE-printed spot colors, to better match hard to hit corporate identity programs or to create special shading effects on shapes and large text. And all done with solid fill printing, not with halftones. **SpectraTint** has been designed to lighten the appearance of the base color, while **SpectraShade** will darken it. Both foils have been formulated for outdoor use for up to three years. These two tinting and shading foils are an excellent means to triple the range of spot colors without tripling the number of foils on the shelf.

GerberColor **Special Effects Foils - Edge 1 and 2**

See page 9 for EDGE FX Special Effects Foils

GerberColor Special Effects (GCX) Series Foils for Gerber imaging devices are specifically designed to produce dramatic and eye-catching graphics. NOTE: Interior use only. The vibrant colors of the GCX Fluorescent line are an excellent choice for creating point-of-purchase displays, safety signage, promotional items, and any interior application that calls for high visibility graphics.

<u>Color</u>	<u>Part Number</u>

GerberColor **Finishing Foils - Edge 1 and 2**

See page 9 for EDGE FX Finishing Foils

New Abrasion Guard SPF is designed for graphics likely to experience repeated handling or frequent contact, this clear overprint GerberColor foil makes GERBER EDGE®-produced graphics considerably more resistant to abrasion, **plus it adds up to 30% longer UV protection to any EDGE output!**

GCF Matte Clear foil enhances the readability of the resulting graphic in applications that require optimum clarity. Designed to reduce the gloss level of printed graphics by up to 60 percent. May also be used as a decorative foil to add the finishing touch to your graphics. Can also be used to “de-gloss” colored vinyl so as to achieve matte vinyls.

GerberColor **ColorSet Intermediate Foils- Edge 1 and 2**

Gerber ColorSet™ thermal transfer process and spot foils have been designed utilizing the Matched Technology System™ (MTS™) - the perfect integration of software, hardware and material - to provide a solution for your short-term Gerber Imaging Device graphic needs. User should determine suitability of all applications before using ColorSet foils.

Performance life is 2-3 years when used with EDGE READY™ materials applied vertically (may vary for mobile (vehicle) graphics.) Appropriate applications include banner graphics, temporary signage, novelty items, short-term interior or exterior markings, and short-term vehicle graphics. ColorSet thermal transfer foils are not appropriate for long-term graphics or markings requiring Spectratone™ or Pantone® Color Simulations.

Compatible Materials: Gerber 220 and 225, 210 Fluorescent; Gerber QUANTUM™ Series 2000 and 4000; Gerber Static Cling; Gerber PlastiGraphix™ PVC-10; Gerber InstaChange™; GerberVision™; Gerber HoloGraphix™; Gerber ImageCast™ & ImageCast Eclipse; Gerber ImageCal™ "P" and "R"; GerberMag™; Gerber AutoMag™; and Gerber Label Stock.

Gerber **225** High Performance Film

High performance 2 mil cast vinyl film on a transparent synthetic liner. Transparent, synthetic liner is moisture-resistant and offers superior registration for multicolor plotter applications and on Gerber imaging device printed graphics. Clear pressure-sensitive adhesive allows for production of attractive two-way markings. Excellent durability with five- to eight-year exterior life; revised Product Bulletin available at www.gspinc.com.

	<u>10- yard roll</u>	<u>25-yard roll</u>
Light Yellow-Green, Matte	P68495A	P68496A

This 13 mil, durable, "glow-in-the-dark" vinyl is for applications that require maximum visibility for both day and

night viewing, suitable for interior safety signage, and identification signs and markings. Gerber Luminous film will "glow" for up to 6 hours and takes only 3 minutes to recharge.

Luminous material meets International Maritime Organization, National Fire Protection Association, and Federal Railroad Administration requirements

Gerber 180 Controltac Plus

Color	Color Code	15" Punched EDGE READY™	
		10- yard roll	50-yard roll
White	180-10	P34703A	P34704A

High performance, 2 mil, gloss vinyl which features pressure-activated adhesive to simplify application of graphics on flat, corrugated and riveted surfaces. Pigmented adhesive provides maximum color opacity. Six- to seven-year exterior life.

Gerber 250Cv2 Controltac with Comply

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P82098A	P82099A

Gerber 250Cv2 Controltac with Comply™ Performance is a 2 mil, repositionable vinyl graphic film with a grey-pigmented, pressure-sensitive adhesive which allows for optimum color opacity. Custom-formulated exclusively for GSP, its unique construction is designed to eliminate air bubbles to make graphic application fast and easy. The Comply™ Performance feature of Series 250 allows air to easily escape through microreplicated channels under the film's surface for easier application. Ideal for large graphics over corrugated and riveted surfaces such as tractor trailers, buses,

and other fleet graphic applications. Series 250 can be used on a wide variety of substrates including ABS resins, aluminum, chrome, glass, fiberglass reinforced plastics, painted surfaces and flat or simple curved surfaces, with and without rivets. This film is not recommended for use on stainless steel, non-3M films, or substrates that do not have a clean, smooth surface or have poor paint-to-substrate adhesion. It is also not intended for applications where petrochemical contact may occur. If petrochemical exposure is anticipated, refer to Product Bulletin available at www.gspinc.com. **Note:** This product replaces a similar product previously called Controltact250c. The old product had a crosshatch pattern visible in the film, The new product has no such pattern.

Gerber Quantum **2000** – Intermediate Film

Intermediate polymeric film perfect for interior and exterior graphics requiring up to 5-year durability. Semi-gloss and matte colors available. Solvent-based, acrylic adhesive.

Gerber **Static Cling Films**

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P50823A	P50824A
White	P53201A	P53202A

Designed to adhere to glass without adhesive, these 7.5 mil specialty vinyls are ideally suited to work with the Gerber imaging devices. Intended for interior applications. Can also be decorated with vinyl graphics.

Gerber **Instachange** – Removable film

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P63030A	P63031A
White Reflective	P74887A	P74888A

White 4.6 mil vinyl film with a gray pigmented adhesive system that is removable for up to two years with no adhesive residue. Pigmented adhesive also allows for maximum opacity of graphics.

Gerber ImageCal “R” – Removable film

Color	15” Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P72778A	P72779A
Clear	P65587A	P65588A

Gerber ImageCal “R” is a removable vinyl designed for use with Gerber Digital Printing Systems and GerberColor™ Foils. Gerber ImageCal “R” is available in two formats that have slightly different characteristics. Product Bulletin available at www.gspinc.com.

Gerber ImageCal “R” Clear is a 3.5 mil, durable, removable, calendared vinyl. For up to six months after application, the film’s unique adhesive allows the graphic to be removed from most surfaces with little or no residue left behind and without the aid of chemicals or accessories.

Gerber ImageCal “R” White is a 4 mil removable and reusable vinyl which can be reused up to 5 times within one year without leaving residue or losing the strength of its adhesive bond.

Gerber GerberVision

Color	15” Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P63021A	P63022A

A perforated 2 mil window film suitable for all types of clear substrate displays, including transit graphics, retail windows, and P.O.P. displays. Clear adhesive system allows for easy removal and replacement.

Gerber Floor Graphics

Color	15” Punched EDGE READY™	
	10- yard roll	50-yard roll
White roll of Controltac and roll of laminate	P66992A	P66991A

EDGE READY™ Floor Graphics material designed for use with the GERBER EDGE® and GerberColor foils in the production of durable, high impact floor and countertop graphics. Production requirements must be followed; the removability of this product for new applications has been extended from six months to one full year without the use of heat or chemicals. This extended product life cannot be made retroactive for graphics that have already been applied.

Gerber GerberGlow

Color	15” Punched EDGE READY™	
	10- yard roll	50-yard roll
Light Yellow-Green - Gloss	P68499A	P68500A

GerberGlow™, a novelty grade “glow-in-the-dark” film, is a 2.5 mil vinyl designed for use with the GERBER EDGE® and GerberColor™ Foils. A charge time of one hour gives the film a bright glow for over 30 minutes, making it an excellent choice for promotional items, interior signage, and other novelty applications.

Gerber HoloGraphix

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Mosaic	P63224A	P63225A
Silver Sheen	P63221A	P63222A
Kaleidoscope	P63227A	P63228A

Holographic 3.6 mil film available in four different patterns that range from a mirror finish (Silver Sheen) to prismatic Kaleidoscope.) Each pattern creates a spectrum of color that adds dynamic visual effects to your graphics. Combine with GerberColor Transparent (GCT) foils for truly spectacular results. Recommended for interior applications .

Gerber Stardust Series

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Stardust Gold	P74779A	P74780A
Stardust Silver	P74782A	P74783A
Stardust Pearl	P82095A	P82096A

Gerber Stardust Gold and Stardust Silver have been developed to provide EDGE® and EDGE 2 owners with expanded opportunities to produce highly durable and attention-getting graphics. These two cast vinyl films feature brilliant metallic flakes, five-year outdoor durability and a pigmented adhesive system to maximize opacity. Gerber Stardust is ideally suited for vehicle, fleet, recreational and marine applications as well as elegant signs and decals. A wide variety of Stardust color effects can be easily created with GerberColor™ transparent Series (GCT) foils. Gerber Stardust Gold and Stardust Silver can also be used in cut-only applications to make beautiful letters and accents.

Gerber ImageCal "P"

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P65583A	P65584A

A clear, calendared 4 mil vinyl film with a permanent adhesive system. Two-year exterior life.

Gerber ImageCast

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P65579A	P65580A

Cast 2 mil vinyl film with a clear adhesive system suitable for all types of graphic displays. This material is similar to Clear Enamel Receptive without the enamel receptive coating. Five-year exterior life.

Gerber Permagrip

<u>Color</u>	15" Punched EDGE READY™	
	10-yard roll	50-yard roll
White	AP75517-10y	AP75517-50y

Gerber PermaGrip is a durable, permanent cast vinyl film for use with Gerber Digital Color Printing Systems and GerberColor foils. It is dimensionally stable and has an extremely aggressive pigmented adhesive system that provides superior hiding power when applied over colored surfaces. Gerber PermaGrip is edge-stripped to eliminate build up of adhesive residue on sprocketed equipment.

Gerber PermaGrip is ideally suited for a wide variety of commercial, industrial and safety applications. It can be used to create interior and exterior labels, emblems, logos and signs on many surfaces including, flat, moderately compound curved and moderately-rough surfaces and some low surface energy materials. The user should determine the suitability of all substrates prior to actual application. This film is not recommended for use on corrugated, riveted or highly irregular surfaces. It is not recommended for flexible signface or flexible banner material. It is also not intended for applications where petrochemical contact may occur. If petrochemical exposure is anticipated, refer to the section below on protecting graphics.

Brushed Gold – 2 mil	P61288A	P61289A
Brushed Silver – 2 mil	P61285A	P61286A

Polyester, 1 or 2 mil material, custom-formulated for use in the Gerber imaging devices for the production of countless commercial and industrial applications which require labels, decals, and identification nameplates, including architectural graphics. Brushed Gold and Brushed Silver are not recommended for exterior applications.

Gerber Label Stock – Security Label Stock

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Chrome Silver	P63033A	P63034A

This 2-mil product was developed for use with the Gerber imaging devices for production of identification markings with tamper-evident protection. Once printed and applied, the word VOID appears, on both the applied surface and the material, if the label is removed.

Gerber LexEdge II

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Matte	P63562A	P63563A

Semi-rigid, 10 mil Lexan® with a custom-formulated print surface specifically designed for use with the Gerber imaging devices. Ideally suited for the production of exhibits, displays, signs, and all types of sub-surface graphics.

Gerber LexEdge Clear

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P67002A	P67003A

LexEdge™ Clear is a clear, polished 10-mil Lexan® material, designed for use with the Gerber imaging devices. A polished version of our current LexEdge II product, LexEdge Clear provides a perfect tool for creating architectural signage, point-of-purchase displays, exhibit graphics, and membrane switch applications. In order to protect its polished surface, LexEdge Clear has a removable, protective mask on the print side of the material for optimal output.

Gerber LexEdge Outdoor

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Matte	P72790A	P72791A

Outdoor durable, this semi-rigid, matte, 10-mil Lexan® has a custom-formulated print surface specifically designed to resist tearing, abrasion and yellowing effects of UV exposure. Formulated for use with the Gerber imaging devices for printing directly onto the final substrate in second surface applications. Ideally suited for the production of ATM/bank, equipment labels, gas station graphics, menu boards and other outdoor graphic displays. Vertical exterior performance life of 3 to 5 years.

Gerber PVC-10 Shelf and Tag - NEW

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P81132A	P81133A

PVC-10 SHELF AND TAG is a white, 10-mil, semi-rigid PVC material. It has been custom formulated for use with Gerber Digital Printing Systems that use EDGE READY™ Materials and GerberColor Foils. PVC-10 SHELF AND TAG can also be decorated with cut-vinyl graphics.

The semi-rigid construction of PVC-10 SHELF AND TAG makes it ideally suited for a number of non-pressure-sensitive applications including signs, menu boards, point-of-purchase displays, permits, identification tags, and door hangers.

NOTE: This product replaces PVC-10HG which was discontinued in July 2007. The new product is virtually identical, though not quite as rigid, so may not be suitable for 'table tent' applications as before.

Gerber **Gerbermag II – New and improved!**

<u>Color</u>	15" Punched EDGE READY™	
	25-foot roll	
White	P81506A	

Flexible, 19-mil, magnetic material, **with a new, smoother matte white surface**, designed for optimal printing on the Gerber imaging devices. Output contour cut on any Omega or GRAPHIX ADVANTAGE® compatible 15" plotter. Used in the production of custom ad specialty magnets.

Gerber **AutoMag II – New and improved!**

<u>Color</u>	15" Punched EDGE READY™	
	25-foot roll	
White	P81508A	

Vehicle-strength 24-mil magnetic material used in the production of custom, removable vehicle graphics. Flexible magnetic material, **with a new, smoother matte white surface**, designed for optimal printing on the Gerber imaging devices. Output contour cut on any Omega or GRAPHIX ADVANTAGE® compatible 15" plotter.

Gerber **Heat Transfer Paper 2**

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P79376A	P79377A

Used in producing custom, heat-applied textile transfers on the Gerber imaging devices. Must be used with GerberColor L.T. (GCLT) Series GerberColor cartridges (see page 5) – replaces earlier versions – be sure to download new material settings from www.gspinc.com

Gerber **Edge Positive – Screenprint film**

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P54964A	P54965A

Crystal clear, 7 mil, top-coated polyester film, custom-formulated for Gerber imaging devices use in the production of screenprinting film positives. Designed for use with GerberColor™ Cartridge Spot Black (GCS-12). For denser black use Jet Black (GCX12)

Gerber **Metallized Polyester**

<u>Color</u>	15" Punched	
	10- yard roll	50-yard roll
Brushed Aluminum	P21016C	P21017C
	10- yard roll	50-yard roll
Shiny Silver	P21018C	P21019C

Polyester-based, 3 mil film with a mirror look on both sides of the material for two sided interior and limited exterior use. One- to two-year life on Silver and Brushed Aluminum.

Gerber **GerberGuard** – Overlamine

<u>Color</u>	<u>15" Punched</u>	
	<u>10- yard roll</u>	<u>50-yard roll</u>
Clear	P61385A	P61386A

Not intended for printing. Gerber Guard is designed to provide additional protection from

petroleum-based or other chemicals, as well as increased abrasion resistance due to exposure to severe handling conditions. Gerber Guard's glossy characteristic creates a more lustrous finish when applied to your Gerber imaging device-produced graphics. May also be used on unprinted vinyl film with the same quality results.

Gerber **UVGuard** – Overlamine

<u>Color</u>	<u>15" Punched</u>	
	<u>10- yard roll</u>	<u>50-yard roll</u>
Clear	P65978A	P65979A

Not intended for printing. Custom-formulated, 1 mil, TEDLAR® overlamine film developed for use with

GerberColor® foils and Series 220 or Series 225 high performance vinyl film. Gerber UVGuard Overlamine offers resistance from harmful UV rays, environmental pollution, and severe abrasion conditions.

Graphic applications previously not recommended, such as decals on horizontal surfaces or graphics applied in extreme weather conditions, may be produced and applied with total confidence.

Gerber **StrikeGuard** – Overlamine

<u>Color</u>	<u>15" Punched</u>	
	<u>10- yard roll</u>	<u>50-yard roll</u>
Clear	P76480A	P75963A

Gerber StrikeGuard is an extra-thick (8mil), flexible clear overlamine designed to provide EDGE®-printed graphics with extreme protection from forceful impact. It has been developed as part of a great new system for producing helmet decals and for decorating "extreme sports" equipment, including recreational vehicles

Gerber **EZ Guard** – Liquid Overlamine

<u>Case of 4, four-liter bottles</u>	P78782A
--------------------------------------	---------

GERBER EZ GUARD (IP28501) is an easy to apply water based liquid overlamine. This non-yellowing overlamine is ideal for the

protection of graphics from UV exposure, abrasion, and handling. It also provides graphics with excellent water and chemical resistance. The gloss finish of this product enhances the visual appearance of the printed graphic. This product requires no special equipment to apply; simply roll it on using common white, low nap or high-density foam rollers.

Gerber **GerberMask ULTRA** – Masking Material – New Improved!

GerberMaskULTRA is a 4-mil white vinyl film, coated with a **low-tack** removable adhesive now on a **new moisture-resistant liner**. Designed to be used as stencil masking film for application to a variety of smooth, flat substrates. The low-tack adhesive allows easy removal from substrates, with no adhesive transfer. Suitable for use on glass, Plexiglas, polycarbonate, flexible vinyl, stainless steel. **NOTE:** GerberMaskULTRA has a low-tack adhesive for easy removal from high energy surfaces. Rough, uneven, or curved surfaces may require a more aggressive adhesive. GerberMask II stencil mask with high-tack adhesive is available if greater substrate adhesion is required.

Gerbermask Ultra Green logo liner		P81773A		P81780A		P81776A		P81336A

Gerber **GerberMask II** – Masking Material

GerberMask™ II is a durable, conformable 4-mil white vinyl film, coated with **aggressive** acrylic removable adhesive. Designed to hold during light sandblasting, acid etching, or paint applications. Removable, with no adhesive transfer. Suitable for use on glass, Plexiglas, stainless steel, unfinished and finished wood surfaces. **DO NOT APPLY GerberMask II TO FLEXIBLE VINYL FILM.** **NOTE:** GerberMask II has a high-tack adhesive that will adhere strongly to smooth, high-energy substrates, such as Plexiglas or polycarbonate. Requires some effort to remove. GerberMask I, with low-tack adhesive, may be more suitable for this type of application. GerberMask I can be used on flexible vinyl substrates.

Fiber Tip Pen, Black, 0.7mm	P82578A	\$5.85
*Gerber Tempo blade degrees are measured from the top down as opposed to bottom up. Therefore, a 30 degree Gerber Tempo™ blade is the same as a 60 degree GS 15™ blade and is used for cutting thicker materials. This 30 degree blade is used with the larger 1.5 mm tool holder.

Gerber Routing Bits

Gerber Gold Routing Bits

Gerber Gold routing bits are designed for greater performance and longer tool life. These remarkable routing bits are made from the highest quality micrograin carbide to the tightest tolerances in the industry. They are then coated with titanium nitride to enhance their durability even further. The result is superior edge quality and lower tooling cost. These high performance bits can be used with all Gerber routers/engravers, as well as with other routers, both automated and manual.

Two-Flute Spiral Bits

These are the most versatile type of bits and are used for general routing of the following materials:

Harder Materials: Such as plate aluminum, brass, bronze, copper; cast acrylics, solid surface materials, particle board, plywood, and hardwoods.

Softer Materials: Such as foam boards, engraving stock, PVC (Sintra®, Komatex, Trovicel®, Celtec, etc.) soft plastics, soft woods, and similar density materials.

These bits provide excellent chip removal from the cut because of the upward spiral action. They also assure excellent edge quality on these materials.

<u>Shank Diameter</u>	<u>Cutting Diameter</u>	<u>Cutting Edge Length</u>	<u>Part Number</u>
1/8"	1/16"	3/16"	P50521B
1/8"	1/8"	1/4"	P50525B
1/8"	1/8"	1/2"	P50522B
1/4"	3/16"	3/8"	P50526B
1/4"	3/16"	5/8"	P50523B
1/4"	3/16"	1 1/8"	P50528B
1/4"	1/4"	1/2"	P50527B
1/4"	1/4"	3/4"	P50524B
1/4"	1/4"	1 1/2"	P50529B
1/4"	1/4"	2 1/4"	P50530B
1/8"	1/8"	1 1/4"	P52819B

Single-Flute Radial Bits

These bits are ideal for cutting sheet aluminum and brass with a thickness of .060" (1.5mm) and less, as well as soft woods and soft alloy aluminum.

Unlike the spiral flute bits, these bits have a single straight cutting edge which doesn't pull up on the work piece. This straight flute allows the bit to "shear" the chip off at the top edge of the material being cut without leaving a burr. The chip extraction, however, will not be as good as a spiral bit.

(NOTE: As of April 2007, these bits are being phased out as inventory is depleted – please note the suggested replacement part numbers – prices and descriptions can be found on the next page)

<u>Shank Diameter</u>	<u>Cutting Diameter</u>	<u>Cutting Edge Length</u>	<u>Part Number</u>	<u>Suggested Replacement</u>
1/4"	1/4"	1 1/2"	P50535B	P80339A

1/4"	1/8"	1/2"	P50532B (disc.)	P80336A
1/4"	1/4"	3/16"	P50533B	P80337A

Gerber Routing Bits – cont.

Three-Flute Spiral Tapered Bits

These bits can be used on all materials listed for the two-flute spiral bits. The difference is that the tapered bits give you an angle on the edge of the material being cut. As a result, these bits are excellent for cutting vacuum form molds.

Also, when you want something other than a straight edge for special applications, these bits can be used to create a "halo" effect without adding any additional cost.

<u>Shank Diameter</u>	<u>Cutting Diameter</u>	<u>Cutting Edge Length</u>	<u>Part Number</u>
1/4"	1/8"	1"	P50643B
1/4"	1/8"	1/2"	P50531B

NEW Gerber Gold Bits

- New GerberGold bits take the guesswork out of choosing the correct bit for a specific substrate by grouping them by application. **To make life even easier**, the application is coded and etched into the shank of the bit, along with the part number for easy identification once the bit has been removed from its sleeve. See application chart on next page.

GP	General Purpose	Gerber Platinum series is a high performance tool for use with Hard and Soft Plastic, Hard and Soft Woods, Wood and Plastic Composites.
AW	Aluminum & Wood	Alucobond®, Diond®, Dilite®, Hardwood, Softwood, Non-Ferrous Metals (Aluminum, Brass, Copper)
LV	Laminates and Veneers	Produces clean top and bottom edges on single and double-sided laminated substrates. Hardwood, Softwood, Wood Composites (MDO, MDF, Plywood, Particle board)
F	Foams (Special Long)	Specially designed for thick foams and soft plastics from 1-1/4" to 2-1/4". HDU (Precision Board™, Signfoam®)
3DM	3D Modeling	Ball Nose bit designed for three-dimensional modeling. Advanced grind technology produces a superior cut in plastics, woods composites and aluminum.
APC	All Purpose Cleanout	Produces a clean bottom finish with a .002" radius inside bottom edge. HDPE (Polycarve™), Aluminum, Woods, Solid Surface
FT	Folding Tool	Carbide tipped specialty bit designed for folding Alucobond®, Diond®, Dilite® up to 90-degrees.
SPF	Soft Plastic & Foam	PVC Foam (Celtec®, Trovicel®, Sintra®, Kometex®), HDU (Signfoam®, Precision Board™), Extruded Acrylic, Styrene, Polycarbonate (Lexan®), HDPE (Polycarve™)

Auto-Carve™ 3D Carving Bits

Gerber V-cutting carbide bits deliver superb cut quality, maximum cutting efficiency, and the longest possible tool life. These specifically designed tools are produced within extremely tight manufacturing tolerances, ensuring the level of accuracy essential to the automated carving process.

Design considerations that impact tool selection:

For Small, Intricate Graphics With Thin Stroke Widths: Choose a tool with a steep angle, such as the 90° tool.

For Large Graphics With Wide Stroke Widths: Choose a tool with a more shallow angle, such as the 150° tool.

<u>Shank Diameter</u>	<u>Tool Diameter</u>	<u>Tool Degree</u>	<u>Part Number</u>
1/4"	1 1/4"	100°	P56372A
1/4"	1 1/4"	110°	P56373A
1/4"	1 1/4"	120°	P56374A
1/4"	1 1/4"	130°	P56375A
1/4"	1 1/4"	140°	P56376A
1/4"	1 1/4"	150°	P56377A
1/4"	1 1/4"	90°	P56371A

Gerber Routing Bits – cont.

Gerber Engraving Bits

Gerber also offers high quality, long and short type industry standard engraving bits. Designed to give excellent results with Gerber equipment, they also work with other routers/engravers. Gerber engraving bits are ideal for applications using Dimension Plus®, ROWMARK®, acrylic, polycarbonate, and other plastic materials.

Engraving Bits (Long Type)

These bits are for top-loading engraving spindlers. Use with Gerber Engraver Options.

<u>Shank Diameter</u>	<u>Cutting Diameter</u>	<u>Part Number</u>
1/4"	.010"	P47767A
1/4"	.020"	P47769A
1/4"	.030"	P47771A
1/4"	.060"	P47775A
1/4"	.090"	P47777A

Engraving Bits (Short Type)

These bits are for bottom-loading collet systems. Use with Router Motor or High Frequency Spindle Option.

<u>Shank Diameter</u>	<u>Cutting Diameter</u>	<u>Part Number</u>
1/4"	.010"	P50536A
1/4"	.020"	P50537A
1/4"	.030"	P50538A
1/4"	.060"	P50539A
1/4"	.090"	P50540A

Gerber Specialty Bits

Braille / Tactile Bits

These bits are used to create ADA (Americans with Disabilities Act) compliant signs. All have shank diameters of 1/4" (6.0mm). The Long Type for use with Dimension 200, ADVANTAGE Router 600 and Sabre Engraver Options. The Short Type has the same tip geometry as the Long Type, but are cut shorter for use in a Router Motor or High Frequency Spindle Option.

<u>Description</u>	<u>Part Number – Long Type</u>	<u>Part Number – Short Type</u>
Braille Cutter (used to cut Braille dots)	P47763A	P47849A
.015" Profile Cutter (used to cut ADA sign borders and surface-mounted text)	P50624A	P50622A
.060" Parallel Cutter (used for cutting both letter clean-out pockets in the sign face and matching male characters for Auto-Inlay™ method)	P50623A	P50625A

<u>Description</u>	<u>Part Number</u>
Table Surfacing Bit. For use with a Router Motor or High Frequency Spindle. Its purpose is to mill the sacrificial table surface perfectly flat in respect to the Z axis and aid in precise depth control when cutting. (1/4" shank dia.) AR600 or Sabre	P52617A
Table Surfacing Bit. For use with a Router Motor or High Frequency Spindle. Its purpose is to mill the sacrificial table surface perfectly flat in respect to the Z axis and aid in precise depth control when cutting. (1/2" shank dia.) AR600 or Sabre	P56327A
Table Surfacing Bit. For use with a Router Motor or High Frequency Spindle. Its purpose is to mill the sacrificial table surface perfectly flat in respect to the Z axis and aid in precise depth control when cutting. (1/4" shank dia.) Dimension 200	P50569A
.750" Round Nose Cutter. This cutter has a full 3/8" (9.5mm) radius on the bottom for producing a rounded groove for specialty applications, or can produce a negative radius on the edge of pieceto be cut out. (1/4" shank dia.)	P26495A
