

Gerber Tempo™ 600

Q: *What is the Gerber Tempo™?*

A: The Gerber Tempo is a fully featured entry level vinyl cutter. It is designed to be easy to buy, easy to use and easy to maintain.

The Gerber Tempo 600 is easy to buy because it comes with the plotter, heavy duty metal stand, USB cable, power cable, and a CD with the driver and manual on it. The Tempo also includes the Advanced Registration Mark (ARMS) system and Omega software, all in one affordable bundled price.

The Tempo is easy to use because it includes a full copy of OMEGA CS (cut solution) software. It also includes a simple plug and play USB cable.

The Tempo is easy to maintain because it is based on world-renowned Graphtec CE-series engineering class technology, so it will provide years of reliable service.

Q: *Who should consider buying the Gerber Tempo 600?*

A: Anyone who is looking to add an affordable reliable entry level vinyl cutter should get the Tempo. Whether it is a new shop just starting out, or an established shop looking to add vinyl cutting capabilities at another output station, the Tempo is the perfect choice!

Q: *What are the Gerber Tempo 600 print-to-cut targeting capabilities?*

A: For the GERBER EDGE, the ARMS System is suitable for light to medium duty print-to-cut jobs. If you occasionally print and cut 1 to 8 foot vinyl and other light duty materials the Tempo ARMS system can be a good fit for you. If cutting the full range of EDGE materials, or if cutting jobs on a regular production basis, or if cutting longer jobs, then a GSP sprocket plotter such as the GSx™15, GS™15 or enVision™ 375 is a better choice for print to cut.

For inkjet print to cut, the Tempo 600 can be used with other RIP software using Graphtec type 2 targets. Unfortunately, Gerber cannot offer phone or technical support for third party RIP software.

Q: *What is the Tempo Warranty?*

A: The Tempo comes with a 2 year factory parts and labor warranty. First level support will be performed over the phone and parts will be shipped to the customer. More advanced repairs will occur at our South Windsor, CT facility.

Q: Where can I purchase Gerber Tempo 600 accessories?

A: Your Gerber distributor carries a broad line of blades, pens and other Tempo accessories.

Additional Gerber Tempo 600 Products	Part Number
Blade for Tempo 600, 0.9mm Supersteel blade, 45 degree, 5/pack	P81925A
