

# Solara ion<sup>x</sup> Options

The Solara ion<sup>x</sup> comes standard with 8-print heads and the roll-to-roll configuration.

BEST VALUE

Flatbed Only Option

An affordable flatbed-only configuration of the Solara ion<sup>x</sup> for customers who want 8 print head performance, but don't have an immediate need for a roll-to-roll printer.

This option offers a 64" x 100" active print area with all of the speed, innovation, and vibrant durable output of the Solara ion<sup>x</sup>!

Roll-to-Roll Upgrade

Expand the highly versatile and robust print functionality of the Solara ion to accommodate all flexible and roll stock printing needs.

Expand the size of the direct-to-rigid print area from 64" x 100" to 64" x 120", making a true 5' x 10' printer!

## Proven Technology;

The combination of Gerber's patent-pending Cold Fire Cure™ technology and GerberCAT™ inks make the Gerber Solara ion Series the most versatile printers in the world.

GerberCAT inks are an exclusive, **VIBRANT**, CMYK four color *FLEXIBLE* cationic UV ink set. GerberCAT Cationic UV inks are cured at approximately room temperature. This greatly expands the range of materials that can be printed by the Solara ion. Heat sensitive plastic, vinyl, fabric, paper-based materials, and even glass and metals can be printed with unmatched adhesion and abrasion resistance.

Cold Fire Cure offers a vast array of benefits over any competitive curing process in the areas of material compatibility, cost of operation, and even environmental health and safety.
