

Materials List and Part Numbers

Contains part numbers for: [Semi-Rigid Films](#)

Materials available in this series:

- EDGE Positive
- LexEdge II
- LexEdge Clear
- LexEdge Outdoor
- PVC-10 Shelf and Tag

Gerber **Edge Positive** – Screenprint film

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P54964A	P54965A

Crystal clear, 7 mil, top-coated polyester film, custom-formulated for Gerber imaging devices use in the production of screenprinting film positives. Designed for use with GerberColor™ Cartridge Spot Black (GCS-12). For denser black use Jet Black (GCX12)

Gerber **LexEdge II**

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Matte	P63562A	P63563A

Semi-rigid, 10 mil Lexan® with a custom-formulated print surface specifically designed for use with the Gerber imaging devices. Ideally suited for the production of exhibits, displays, signs, and all types of sub-surface graphics.

Gerber **LexEdge Clear**

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P67002A	P67003A

LexEdge™ Clear is a clear, polished 10-mil Lexan® material, designed for use with the Gerber imaging devices. A polished version of our current LexEdge II product, LexEdge Clear provides a perfect tool for creating architectural signage, point-of-purchase displays, exhibit graphics, and membrane switch applications. In order to protect its polished surface, LexEdge Clear has a removable, protective mask on the print side of the material for optimal output.

Gerber **LexEdge Outdoor**

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Matte	P72790A	P72791A

Outdoor durable, this semi-rigid, matte, 10-mil Lexan® has a custom-formulated print surface specifically designed to resist tearing, abrasion and yellowing effects of UV exposure. Formulated for use with the Gerber imaging devices for printing directly onto the final substrate in second surface applications. Ideally suited for the production of ATM/bank, equipment labels, gas station graphics, menu boards and other outdoor graphic displays. Vertical exterior performance life of 3 to 5 years.

Gerber **PVC-10 Shelf and Tag**

<u>Color</u>	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P81132A	P81133A

PVC-10 SHELF AND TAG is a white, 10-mil, semi-rigid PVC material. It has been custom formulated for use with Gerber Digital Printing Systems that use EDGE READY™ Materials and GerberColor Foils. PVC-10 SHELF AND TAG can also be decorated with cut-vinyl graphics.

The semi-rigid construction of PVC-10 SHELF AND TAG makes it ideally suited for a number of non-pressure-sensitive applications including signs, menu boards, point-of-purchase displays, permits, identification tags, and door hangers.

NOTE: This product replaces PVC-10HG which was discontinued in July 2007. The new product is virtually identical, though not quite as rigid, so may not be suitable for 'table tent' applications as before.
