

Materials List and Part Numbers

Contains part numbers for: [Specialty Permanent Films](#)

Materials available in this series:

- 210 Deluxe Gold & Silver
- 210 Fluorescent
- 250C Controltac
- Floor Graphics
- GerberGlow
- GerberVision
- Heat Transfer Paper 2
- Holographix
- ImageCal "P"
- ImageCast
- Luminous Film
- Permagrip
- Stardust

Gerber 210 Deluxe Gold and Silver

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll

Deluxe Gold 210-131	P72382A	P72383A
Deluxe Silver 210-120	P51895A	P57757A

Mirror-finish 3 mil vinyl film designed for use with Gerber imaging devices, as well as standard "cut" vinyl applications. Five-year exterior life. Product Bulletin available at www.gspinc.com.

Gerber 210 Fluorescent Film

Color	Color Code	15" Punched EDGE READY™
		10- yard roll
Yellow-Orange	210-404	P48303A
Lemon-Yellow	210-405	P48304A
Lime Green	210-406	P48305A
Pink	210-413	P48307A
Red-Orange	210-414	P48534A

Vibrant, attention-getting 5 mil films provide excellent visibility under normal or low light conditions. Perfect for point of purchase, window graphics, and displays. One-year exterior life.

Gerber 250Cv2 Controltac with Comply

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P82098A	P82099A

Gerber 250Cv2 Controltac with Comply™ Performance is a 2 mil, repositionable vinyl graphic film with a grey-pigmented, pressure-sensitive adhesive which allows for optimum color opacity. Custom-formulated exclusively for GSP, its unique construction is designed to eliminate air bubbles to make graphic application fast and easy. The Comply™ Performance feature of Series 250 allows air to easily escape through microreplicated channels under the film's surface for easier application. Ideal for large graphics over corrugated and riveted surfaces such as tractor trailers, buses,

and other fleet graphic applications. Series 250 can be used on a wide variety of substrates including ABS resins, aluminum, chrome, glass, fiberglass reinforced plastics, painted surfaces and flat or simple curved surfaces, with and without rivets. This film is not recommended for use on stainless steel, non-3M films, or substrates that do not have a clean, smooth surface or have poor paint-to-substrate adhesion. It is also not intended for applications where petrochemical contact may occur. If petrochemical exposure is anticipated, refer to Product Bulletin available at www.gspinc.com. **Note:** This product replaces a similar product previously called Controltact250c. The old product had a crosshatch pattern visible in the film, The new product has no such pattern.

Gerber Floor Graphics

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White roll of Controltac and roll of laminate	P66992A	P66991A

EDGE READY™ Floor Graphics material designed for use with the GERBER EDGE® and GerberColor foils in the production of durable, high impact floor and countertop graphics. Production requirements must be followed; the removability of this product for new applications has been extended from six months to one full year without the use of heat or chemicals. This extended product life cannot be made retroactive for graphics that have already been applied.

Gerber GerberGlow

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Light Yellow-Green - Gloss	P68499A	P68500A

GerberGlow™, a novelty grade “glow-in-the-dark” film, is a 2.5 mil vinyl designed for use with the GERBER EDGE® and GerberColor™ Foils. A charge time of one hour gives the film a bright glow for over 30 minutes, making it an excellent choice for promotional items, interior signage, and other novelty applications.

Gerber GerberVision

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P63021A	P63022A

A perforated 2 mil window film suitable for all types of clear substrate displays, including transit graphics, retail windows, and P.O.P. displays. Clear adhesive system allows for easy removal and replacement.

Gerber Heat Transfer Paper 2

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	P79376A	P79377A

Used in producing custom, heat-applied textile transfers on the Gerber imaging devices. Must be used with GerberColor L.T. (GCLT) Series GerberColor cartridges (see page 5) – replaces earlier versions – be sure to download new material settings from www.gspinc.com

Gerber HoloGraphix

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Mosaic	P63224A	P63225A
Silver Sheen	P63221A	P63222A
Kaleidoscope	P63227A	P63228A

Holographic 3.6 mil film available in four different patterns that range from a mirror finish (Silver Sheen) to prismatic Kaleidoscope.) Each pattern creates a spectrum of color that adds dynamic visual effects to your graphics. Combine with GerberColor Transparent (GCT) foils for truly spectacular results. Recommended for interior applications .

Gerber ImageCal “P”

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P65583A	P65584A

A clear, calendered 4 mil vinyl film with a permanent adhesive system. Two-year exterior life.

Gerber ImageCast

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Clear	P65579A	P65580A

Cast 2 mil vinyl film with a clear adhesive system suitable for all types of graphic displays. This material is similar to Clear Enamel Receptive without the enamel receptive coating. Five-year exterior life.

Gerber Luminous Film

Color	15" Punched EDGE READY™	
	10- yard roll	25-yard roll
Light Yellow-Green, Matte	P68495A	P68496A

This 13 mil, durable, "glow-in-the-dark" vinyl is for applications that require maximum visibility for both day and

night viewing, suitable for interior safety signage, and identification signs and markings. Gerber Luminous film will "glow" for up to 6 hours and takes only 3 minutes to recharge. Luminous material meets International Maritime Organization, National Fire Protection Association, and Federal Railroad Administration requirements

Gerber Permagrip

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
White	AP75517-10y	AP75517-50y

Gerber PermaGrip is a durable, permanent cast vinyl film for use with Gerber Digital Color Printing Systems and GerberColor foils. It is dimensionally stable and has an extremely aggressive pigmented adhesive system that provides superior hiding power when applied over colored surfaces. Gerber PermaGrip is edge-stripped to eliminate build up of adhesive residue on sprocketed equipment.

Gerber PermaGrip is ideally suited for a wide variety of commercial, industrial and safety applications. It can be used to create interior and exterior labels, emblems, logos and signs on many surfaces including, flat, moderately compound curved and moderately-rough surfaces and some low surface energy materials. The user should determine the suitability of all substrates prior to actual application. This film is not recommended for use on corrugated, riveted or highly irregular surfaces. It is not recommended for flexible signface or flexible banner material. It is also not intended for applications where petrochemical contact may occur. If petrochemical exposure is anticipated, refer to the section below on protecting graphics.

Gerber Stardust Series

Color	15" Punched EDGE READY™	
	10- yard roll	50-yard roll
Stardust Gold	P74779A	P74780A
Stardust Silver	P74782A	P74783A
Stardust Pearl	P82095A	P82096A

Gerber Stardust Gold and Stardust Silver have been developed to provide EDGE® and EDGE 2 owners with expanded opportunities to produce highly durable and attention-getting graphics. These two cast vinyl films feature brilliant metallic flakes, five-year outdoor durability and a pigmented adhesive system to maximize opacity. Gerber Stardust is ideally suited for vehicle, fleet, recreational and marine applications as well as elegant signs and decals. A wide variety of Stardust color effects can be easily created with GerberColor™ transparent Series (GCT) foils. Gerber Stardust Gold and Stardust Silver can also be used in cut-only applications to make beautiful letters and accents.
