Gerber Scientific Products Offers New Signshop Helper Graphics Package with OMEGA™ 3.0 Upgrade

SOUTH WINDSOR, CT – September 17, 2009 – Gerber Scientific Products, a worldwide leader in sign-making and specialty graphics systems headquartered in South Windsor, CT, is proud to offer the new Gerber Signshop Helper graphics package free for a limited time with new OMEGA software packages and OMEGA™ 3.0 software upgrades.

The Signshop Helper clip art package offers two thousand pieces of material, including vehicle decoration pieces and examples of great signs shop owners can use as a base which can then be decorated and personalized. In addition, the Signshop Helper graphics package offers sign backgrounds such as lightning, flames, metallic and watermark looks that are great for signs made with large format printers or the Gerber EDGE®. The Signshop Helper package also offers North American vehicle templates, which are a very good representation of the locations of the lines, wheel wells and doors for recent and current model American-made cars and trucks. These vehicle templates allow users to show clients how the finished piece will look, making the Gerber Signshop Helper graphics package a great tool for attracting new clients.

The Signshop Helper graphics package is not only a great value, it offers sign shop owners the ability to create high quality signs with ease. Art Schilling, owner of East Coast Artie's Signs in Surfside Beach, South Carolina notes, "Over the years, I've learned many tricks that allow me to make great signs, and it can be a long process to teach my employees how to produce signs of that high quality. The Gerber Signshop Helper graphics package has these design tricks built into the software. All you have to do is push a button and it's done. The Signshop Helper package is a great addition to the OMEGA software because it really helps sign shops create professional signs that sell."
